# Abdallah Daknache

**SENIOR MOBILE ENGINEER · MOBILE LEADERSHIP · AI-FIRST ENGINEERING**

Limassol, Cyprus · Open to relocation · abdallah.daknache@gmail.com · linkedin.com/in/abdallah-daknache · abdallahdaknache.com

## PROFESSIONAL SUMMARY

Senior Mobile Engineer with 7+ years across backend, web, and mobile, leading mobile initiatives end to end on Pepperstone's global trading app. I combine React Native and TypeScript depth with ownership of delivery, cross-functional alignment, and mentoring. I work AI-first every day and lead AI adoption in my team to raise delivery speed, with the review and guardrails a regulated fintech product requires.

## PROFESSIONAL EXPERIENCE

**Pepperstone** · Limassol, Cyprus · Multi-award-winning global online broker

**Senior Mobile Engineer** — Aug 2024 – Present

- Lead mobile initiatives end to end, from shaping requirements with product through architecture, delivery, and release, balancing business priorities, technical trade-offs, and long-term maintainability.
- Align engineering, product, design, and QA on scope, dependencies, and risks; keep stakeholders informed on decisions and progress.
- Mentor engineers through technical guidance and code reviews that build judgment, not just catch bugs.
- Use AI across my daily workflow and lead its adoption in the team, building and sharing reusable AI-assisted workflows that make engineers more efficient.

**Mobile Engineer** — Jul 2022 – Jul 2024

- Delivered features for a production React Native and TypeScript trading app with real-time market data, where responsiveness and reliability are business-critical.
- Made app performance measurable by building a native iOS startup-time module, then profiled and resolved rendering bottlenecks, so performance work could be prioritised on data.
- Strengthened production readiness through monitoring and analytics (Sentry, Datadog, Segment) and automated CI/CD builds and App Store / Google Play releases.

**EverestCM** · Limassol, Cyprus (Remote)

**Senior Frontend Engineer** — Oct 2021 – Jul 2022

- Delivered React and TypeScript features, improving frontend maintainability and resolving performance bottlenecks.
- Integrated backend APIs and contributed to Docker and Terraform workflows supporting application delivery.

**Orea.io** · Limassol, Cyprus

**Mid-Level Frontend Engineer** — Feb 2021 – Oct 2021

- Built a React pre-trade application with responsive interfaces for data-intensive trading workflows.
- Partnered with product and design on usability, reusable components, and frontend architecture decisions.

**GO.MEDIA KG** · Remote (Germany)

**Mid-Level Backend Engineer** — Jul 2020 – Aug 2021

**Junior Backend Engineer** — May 2019 – Jun 2020

- Developed and maintained backend services and REST APIs with NestJS, Node.js, and TypeScript.
- Implemented business logic, third-party integrations, and data-processing workflows.

## SKILLS

| | |
|---|---|
| **Leadership** | Initiative ownership · Technical direction · Cross-functional delivery · Stakeholder communication · Mentoring · Engineering practices |
| **AI** | AI-first development · AI coding agents · AI-assisted code review & testing · Workflow automation · Team AI enablement |
| **Mobile** | React Native (New Architecture, Hermes) · TypeScript · Native iOS · Redux, Zustand, React Query · Real-time data (WebSockets) · Performance |
| **Quality & delivery** | Jest, React Native Testing Library, Detox · Sentry, Datadog, Segment · CI/CD · App Store & Google Play releases · Feature flags & A/B testing |
| **Breadth** | React · Next.js · Node.js · NestJS · Docker · Terraform · AWS |
