SUMMARY

Senior Mobile Engineer with 7+ years across backend, web, and mobile, on the platform team behind Pepperstone's global trading app. I own core initiatives end to end, built the shared sign-in platform used across web and mobile, and take part in technical interviews as the team grows. I work AI-first and champion AI adoption in my team. Open to leadership roles.

EXPERIENCE

Pepperstone · Limassol, Cyprus · Multi-award-winning global online broker

Senior Mobile Engineer — Aug 2024 – Present

- Own core initiatives on the platform team, which owns the app's shared foundations, from requirements through release.
- Built the shared sign-in platform used across Pepperstone's web and mobile apps, giving clients one secure, consistent experience and removing duplicated work across teams.
- Align product, design, and engineering on scope, risks, and progress.
- Took part in growing the engineering team to 10 people through technical interviews; share knowledge with mid-level and junior engineers.
- Champion AI adoption in the team by sharing reusable workflows that make engineers more efficient.

Mobile Engineer — Jul 2022 – Jul 2024

- Delivered features for a production React Native trading app where speed and reliability are business-critical.
- Made app performance measurable, so performance work could be prioritised on data.
- Strengthened production readiness through monitoring, analytics, and automated releases.

EverestCM · Limassol, Cyprus (Remote)

Senior Frontend Engineer — Oct 2021 – Jul 2022

- Delivered web features and improved the maintainability and performance of the frontend.

Orea.io · Limassol, Cyprus

Mid-Level Frontend Engineer — Feb 2021 – Oct 2021

- Built a pre-trade web application with product and design, focused on fast, data-heavy trading workflows.

GO.MEDIA KG · Germany (Remote)

Mid-Level Backend Engineer — Jul 2020 – Aug 2021

Junior Backend Engineer — May 2019 – Jun 2020

- Built backend services and APIs, including business logic and third-party integrations.

SKILLS

Ways of working	Initiative ownership · Cross-team delivery · Knowledge sharing · Technical interviewing
AI	AI-first engineering · Team AI enablement
Engineering	React Native · TypeScript · iOS · Platform & authentication · Performance
